OUR SUSTAINABLE PRACTICES

WATER CONSERVATION

At Hartley Produce, a pipeline transports water from the Columbia River, reducing evaporation during irrigation. We also employ drip irrigation across several farms, directly watering onion roots to save water and boost plant health.

PACKAGING

We're advancing sustainable packaging, using reusable plastic containers (RPCs) and pallets to reduce waste.

SOIL HEALTH

To preserve soil health, we rotate crops, use cover crops, and conduct soil sampling. Our organic laser weeder minimizes chemical use, protects beneficial insects, and reduces soil disturbance.

RESPONSIBLE LABOR PRACTICES

Onions 52 upholds responsible labor standards: ethical recruitment, adherence to worker guidelines, fair compensation, and fostering a culture of food safety through ongoing leadership training.

SEED SELECTION

We select seeds optimized for high yields and land conservation, maintaining records of seed variety and vendors to ensure sustainability.

FOOD SAFETY

When it comes to food safety, we hold our growers and facilities to the highest standards through a rigorous approved supplier program; ensuring our harvesting, packing and storing practices exceed industry standards.

ONIONS 52®

PROTECTING OUR POLLINATORS

WHY IT MATTERS

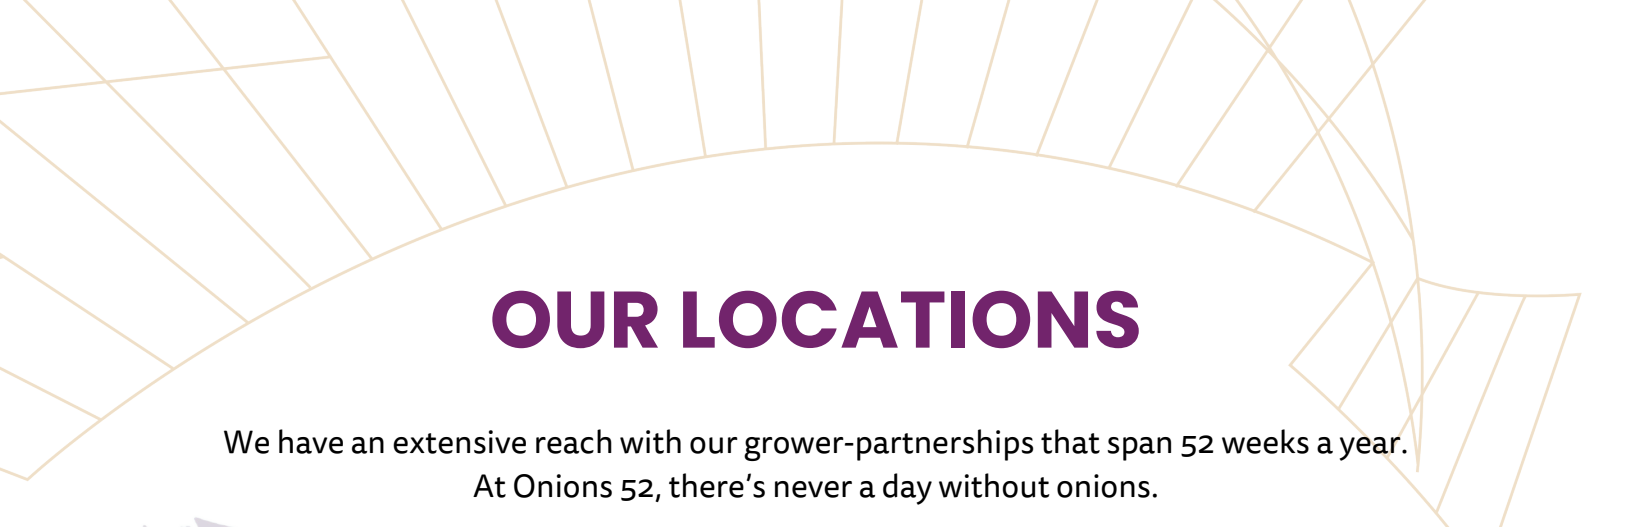

Pollinators like bees and butterflies are vital for thriving onion fields, but their populations are in decline. Integrated Pest Management (IPM) is a sustainable strategy that combines multiple methods to manage pests effectively while reducing economic, health, and environmental risks. By emphasizing prevention, IPM uses a balanced mix of biological, physical, and targeted chemical controls—minimizing reliance on pesticides. This approach delivers long-term, cost-effective, and environmentally responsible solutions for pest management.

OUR COMMITMENT

At Onions 52, we are fully committed to implementing IPM practices across all our farms. By reducing pesticide use, protecting beneficial insects, and promoting biodiversity, we're fostering healthier ecosystems and more resilient onions. We're proud to be on track to achieve full IPM certification at all locations by the end of 2025, ensuring our onion fields meet the highest standards for pollinator protection and environmental stewardship.

ONIONS 52®

OUR LOCATIONS

We have an extensive reach with our grower-partnerships that span 52 weeks a year.
At Onions 52, there's never a day without onions.

EASTWARD EXPANSION

★ Cincinnati, Ohio

- 60,000-square-foot distribution and packing facility
- The new facility enhances support for East Coast retailers and foodservice partners
- The expansion adds more packing machines and sorting lines, boosting production and efficiency
- The new facility complements existing FOB shipping locations in Utah, Washington, Oregon, Texas, and New Mexico
- Onions 52 maintains high standards in quality, consistency, and service for both customers and growers

ONIONS 52®

UTAH GROWN

Superior Flavor & Quality

Utah's unique climate, with abundant sunshine and cool nights, produces crisp, flavorful onions with exceptional quality

Fresh & Sustainable

Sourcing locally grown Utah onions reduces transportation-related carbon footprints, ensuring fresher, more nutritious produce for chefs and consumers

Eco-Friendly Farming

Our Utah growers use sustainable practices like crop rotation and water conservation, preserving soil health and water resources for a resilient food system
