AUDIT TYPE:

Announced Audit

AUDIT SCOPE:

This facility is a year round facility that packs and or repacks dry onions (conventional). This facility is approximately 27000 sq ft of space with two coolers. There are approximately 35 full time employees that pack/repack on 2 lines. On this date there the large volm pack machine was in operation. The product is received and tagged with a lot # and tracked through the whole process via Famous. The product is unloaded onto the conveyor and is visually inspected and then graded for size and then bagged into smaller various sizes. Each item is tagged with a identifying lot# and date. Rework is marked and designated by code. There is notation to the flow of this line and the repack line that was not in used on this date. All product is stored into one of the coolers until shipment. There is no immediate threats to this facility. The facility is alarmed and monitored by video.
